

Tusco Rifle Club Indoor Range Improvement Project

OUT WITH THE OLD – IN WITH THE NEW!

The 22 indoor range in the Main Club House has been replaced! The old “rubber belt” system has been updated with a new, safer and more efficient metal bullet-trap system.

This project was made possible with a generous grant from The NRA Foundation in the amount of \$6,275.

Joe Bosio, project supervisor, along with numerous other Tusco Rifle Club members, donated countless hours working hard to complete this job.

A few minor details will be completed in the next week or two and then the 22 indoor range will once again be open – for 22 caliber ONLY at this time. Please refer to our web-site for the official opening date.

*A heartfelt “Thank you” to The NRA Foundation
and to all of those who volunteered their time to make this project possible!*
